Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Manual of Phonography This work is a presentation of the system of phonetic shorthand, the elementary parts of which were originally invented by Isaac Pitman, of Bath, England, in 1837; which was modified, improved, and named Phonography by him, in 1840; and which, developed and perfected through the suggestions, experiments, and tests of a multitude of practical writers in England and America, reached, substantially, its present form in the later fifties. The chief advances in the present revision consist in a somewhat modified and improved order of presenting the several appendages, in the earlier introduction of logograms, with suitable exercises, and in the addition of a new and copious set of dictation exercises. It is natural, considering the astonishing spread of phonography of late years, that many variations upon the recognized system should...
