

Chernobyl, Nuclear Energy and Risk Perception

By Sandra Schindlauer

GRIN Verlag Jul 2011, 2011. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2008 in the subject Sociology - Economy and Industry, grade: 1,0, Mid Sweden University (Department of Sociology), course: Risk Management and Risk Communication, language: English, abstract: The present essay deals with the issue of the danger and Risk Perception of nuclear energy in connection with the nuclear accident in Chernobyl in the year 1986. Under the central question: can Risk Management be successful concerning the reduction of the people's Risk Perception of nuclear energy and nuclear accidents it was attempted to find a first answer based on the analysis of newspaper articles and books. Thereby the role of the media and the psychology of the people is kept in mind. Although the accident in Chernobyl happened already 22 years ago, it left a lasting mark on the people's perception of the safety of nuclear energy and nuclear power in general. The problems arising in the context of managing these risks are highlighted as well as the question whether and how these problems, if applicable, can be solved. Although the people...
