

Major threats to marine biodiversity

By Huang Bei

LAP Lambert Academic Publishing Nov 2015, 2015.
 Taschenbuch. Book Condition: Neu. 220x150x5 mm. Neuware -
 Biodiversity is important for the survival and development of
 human society, affects various aspects of our lives, and is
 suffering from the rapid expansion of modern society and
 economy. At present, marine biodiversity faces various
 anthropogenic threats including land-based pollution,
 eutrophication, destructive fishing, habitat alteration, invasion
 of non-indigenous species and global climate change. Since
 such threats are commonly found in various areas in the
 NOWPAP region, NOWPAP is responsible for coordination of
 regional activities for assessment of the state of the marine
 and coastal environment, trying to develop a new marine
 environmental assessment method for marine biodiversity
 conservation. This book is one of NOWPAP activities on marine
 biodiversity, which assessed the status of biodiversity and
 environment protection in typical coastal zones of northern
 China and investigated the impacts of socio-economic
 development to the local biodiversity in a relatively long period
 using the PSR framework based on the data of social
 economic development during 2004-2013 and related
 ecological environment studies. 88 pp. Englisch.
