No one batted an eye when he took off for parts unknown after a hearty breakfast. Read how he almost burned down his school with a science fair project, turned on neighbors lights with high-powered radio gear, violated top-secret security procedures, stuffed monkeys into small race cars, built a one-armed robot that drank too much, and other antics while on his way to earning his mad scientist moniker. Richard has written articles for electronics and automotive publications, including How to Build Max-Performance HEMI Engines. He adopted the phrase that still gets him into hot water: After all, how hard can it be? About the Author Richard Nedbal lives with his wife Linda and two Corgis in Northern California.
