The pupil has, moreover, or should have, access always to Gray s Manual or Wood s Class Book if this smaller manual fails him. It is undoubtedly true that the old method of analysis and identification of a large number of species has been overdone, and that the better method is that of comparative study of the more important families as indicated by Spalding. Yet Mr. Bergen s book contains enough material to give the student the method of floral analysis which every student of botany should understand. This book contains more distinct features than any elementary text book with which I am acquainted. Running through it...
