Battleships: Issues Arising from the Explosion Aboard the U.S.S. Iowa: T-Nsiad-90-46

By -

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.GAO discussed several issues pertaining to a gun turret explosion on the U. S. S. Iowa. GAO noted that concern has been expressed on the adequacy of the Navys investigation and the continued safety of battleships, and: (1) conducted an independent investigation of the Navys technical analysis of likely causes of the explosion; (2) reviewed the battleships safety; and (3) examined manning and training issues raised by the vessels commander after the explosion. GAO found that: (1) the impact sensitivity of the gunpowder in combination with an overram at higher-than-normal speeds could have caused the explosion; (2) safety policies and procedures were not being followed at the time of the explosion; and (3) the vessel was assigned a disproportionately low percentage of enlisted supervisory personnel, including gunners mates and fire controlmen. GAO believes that: (1) further testing on the Navys technical findings is needed; (2) the safety violations did not contribute to the explosion; and (3) the quality of manning was lower than for naval ships on average. This item ships from La Vergne,TN. Paperback.
